DOC'S Wildlife Blends

Blending Science, Medicine and Wildlife Nutrition

A complete line of premium minerals, feeds and food plots... designed to maximize your herd's genetic potential!

Doc's Wildlife Blends was founded by Doctor Timothy Jones, DDS (a private practice dentist in Aurora, Nebraska with a Chemistry/Health Science Degree from Wayne State College) and Doctor Kenneth Vettel, MD (a board certified family physician in private practice in Grand Island, Nebraska with a Chemistry Degree from UNL, and a Petroleum Lab Specialty Degree from the U.S. Army). Additionally involved in the science and development of Doc's Wildlife Blends was Doctor Michael Jones, DDS (a private practice dentist with a Masters Degree in Biochemistry and Ruminant Nutrition) and Tyler Vettel (a medical student at the University of Nebraska Medical Center with a Life Science Degree).

Doctor Timothy Jones and Doctor Kenneth Vettel originally had a vision of having "the mind of a physician and the heart of a bow hunter". Doc's Wildlife Blends was their mechanism to share their scientific background, medical expertise and passion for wildlife nutrition, along with improving each hunting experience with friends and family.

By combining forces with Aurora Cooperative, Doc's Wildlife Blends has added the experience, knowledge and expertise of an entire agricultural corporation. By combining their scientific and medical training with Aurora Coop's agricultural and agronomy expertise (including minerals, feeds, herbicides, soil testing, and fertilizers) Doc's Wildlife Blends has created the highest quality minerals, feeds and food plots in the wildlife industry.

The founders have a passion and a commitment to the stewardship and conservation of wildlife holistically. Their goal is to continue to develop the absolute best year round wildlife management system through food plots, minerals and supplemental feeds, The Doc's System and that is **Your Prescription for Better Bucks!**

Minerals

Mineral Licks

Mineral Licks is a mineral supplement, designed to maximize herd health and antler development. Mineral Licks is nutritionally sound. We use only the finest ingredients which are proven by their ability to attract and maintain wildlife health. Our minerals contain the finest inorganic and organic trace minerals chelated to amino acids to increase absorption and bioavailability, producing enhanced growth, development and antler formation. Mineral Licks is available in a variety of aromas, to mimic the aromas of your herd's natural environment and nutritional supplements. Mineral Licks was founded on the principles of science, medicine and animal nutrition. Calcium 14.5-17.4%, Phosphorus 8%, Sodium Chloride 13.5-16.2%, Magnesium 2.4%, Zinc 6910 PPM, Copper 2830 PPM, Selenium 36 PPM.

Rack Rock

Doc's Rack Rock is a block form mineral supplement that utilizes the same quality, flavor and aroma technology found in Mineral Licks. Calcium 8-10%, Phosphorus Min. 7%, Sodium Chloride (Salt) 11-13%, Potassium Min. .14%, Magnesium 2.5%, Copper 2826 PPM, Zinc 8951 PPM, Selenium 36 PPM.

Feeds

Rack Rage

Rack Rage is a feed supplement, designed to maximize herd health and antler development. Rack Rage is nutritionally sound. We use only the finest ingredients which are proven by their ability to attract and maintain wildlife health. Rack Rage contains organic trace minerals combined with vitamin packs and chelated amino acids to increase milk production and bolster the immune system, thus enhancing growth, development and antler formation. Rack Rage contains digestible fiber providing energy without the depression in forage digestion, that occurs in starch based feed supplements. Rack Rage is available in a variety of flavors and aromas designed to specifically fit your geographic needs. Rack Rage was founded on the principles of science, medicine and animal nutrition. Utilizing smaller pellet design to provide better flow through feeders and a mold inhibitor, to insure maximum benefit to your animals. Protein 20%, Fat 3.5%, Fiber 7.5%, Calcium 3.9-4.2%, Phosphorus 1.9%, Sodium Chloride (Salt) 1.9-2.1%.

Rack Block

Rack Block is a wildlife feed supplement, designed to provide protein and energy during periods of increased metabolic demand. Rack Block provides a quick, high energy "snack" for your bucks, during the reproductive stress of the pre-rut, rut and post-rut troling phases of the reproductive cycle. Rack Block was founded on the principles of science, medicine animal nutrition. Protein 24% Min., Fiber 3% Max., Fat 10%, Calcium 3.5-4.5%, Phosphorus % Min., Sodium Chloride (Salt) 2-4%.

Turkey Products

Turkey Blend or Block

Turkey Blend is a wildlife feed designed to enhance the health of your turkey flock as well as benefits to other upland game such as Pheasant and Quail. Turkey Blend is available in block and blend forms. Our Block satisfies the natural pecking instinct. Turkey Blend contains naturally occurring seeds combined with feed supplements to attract and promote flock health. Developed in conjunction with national turkey experts. Turkey Blend and Block were founded on the principles of science, medicine and animal nutrition. Turkey Blend: Protein Min., 22%, Fat 2% Min., Fiber 5% Max., Calcium 1.95-2.25%, Phosphorus .6%, Sodium Chloride (Salt) .5-.85%. Turkey Block: Protein Min., 14%, Fat 8% Min., Fiber 8% Max., Calcium 4-5%, Phosphorus 1% Min., Sodium Chloride (Salt) .3-.8%.

Food Plot Blends

Food Plot Soil Test

Having the proper soil pH and nutrients are critical to successful food plot establishment. When ordered, instructions and an information form to submit soil samples will be emailed to you. You will receive results and expert recommendations within 5 business days after we receive your samples.

Premium Alfalfa Blend

Doc's Premium Alfalfa Blend is a blend of high quality alfalfas, with pH and drought tolerant varieties. Doc's Premium Alfalfa Blend provides a quality protein and nutritious alfalfa blend, for maximum attraction and palatability. Doc's Premium Alfalfa Blend grows best in well drained soils.

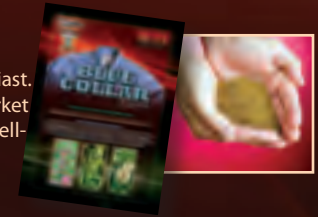

Premium Clover Blend

Doc's Premium Clover Blend is a blend of high quality perennial clovers with an annual clover. This blend ensures maximal growth the first year, and growth for years to come, providing a tremendous source of nutrition, protein, and attraction year-round. Doc's Premium Clover Blend provides early growth and nutrition for your herd during antler growth and development. Doc's Premium Clover Blend grows well in most soil types including low-lying moist soils but prefers well-drained medium to heavy fertile soils.

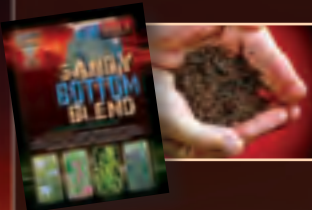

Blue Collar Blend

Doc's Blue Collar Blend is a blend of the most cost effective high quality food plot seeds for the outdoor enthusiast. By using noncertified seeds, it gives the highest quality food plots at the most cost-effective price on the market today. Doc's Blue Collar Blend is a blend of clovers and alfalfa designed to grow well in most soil types but prefers well-drained light to heavy soils.

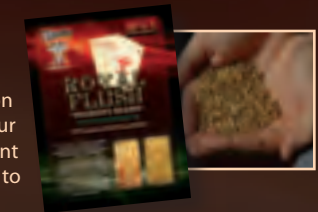

Sandy Bottom Blend

Doc's Sandy Bottom Blend is an excellent choice to enhance utilization of riverbottom roads and travel corridors. Doc's Sandy Bottom Blend is a high quality chicory, clover, alfalfa and vetch designed for growth and nutrition in sandy, low moisture soils. In order to provide a higher quality food plot, pH testing and fertilizer may be needed in extremely sandy soils but prefers well-drained lighter soils.

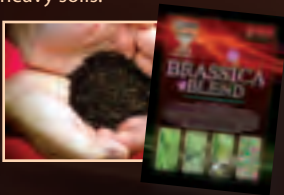

Royal Flush

Doc's Royal Flush is a blend of premium wheat and oats designed to provide a tremendous fall growth for nutrition and attraction. Doc's Royal Flush was designed to meet the high seasonal demand your property encounters as your herd prepares for the breeding season and winter months that lie ahead. Doc's Royal Flush also serves as an excellent seed to over sow for a fall hunting plot. Doc's Royal Flush grows well in most soil types but prefers well-drained light to heavy soils.

Brassica Blend

Doc's Brassica Blend is a blend of rape, kale, forage turnips and annual clover. Doc's Brassica Blend was designed for unsurpassed attraction, growth and palatability during your fall and winter months. Once the first freeze occurs, the brassica starches are converted to sugars, providing maximal attraction, and nutrition on your hunting property. Doc's Brassica Blend grows best in soils with adequate nitrogen and moisture.

Food Plot Blends (continued)

Texas Blend

Doc's Texas Blend is a blend of pH and drought tolerant seeds that fair well with heavy grazing. Doc's Texas Blend is a mix of cowpeas, lab lab, alfalfa, and vetch. This product ensures maximal nutrition during periods of heat stress.. Widely adapted to lighter soils.

Straight Seed

Soy Beans & Corn

Doc's also has available conventional and Round-Up ready corn, soybeans, and sorghum for your food plot needs.

Sorghum

Sweet sorghum and treated sorghum available to design a late season browsing food plot and great bedding cover throughout the fall.

Wild B^oar Pr^oducts

Hog Bait

Hog Bait is a pelleted attractant designed to draw wild hogs to your location. Designed with a strong hog attractant, Hog Bait has a tremendous ability to keep hogs away from your more expensive nutritional supplements that are intended for other wildlife. The smaller pellet size allows the feed to be used in broadcast feeders with less chance of gumming or jamming. Doc's Hog Bait keeps 'em coming in.

Partners:

Doc's Wildlife Blends is proud to support the following productions by supplying the most complete nutrition program available.

	Protein Content	Drought Tolerance	Optimum Soil PH	Acceptable pH	Preferred Soil Type	Planting Depth	Planting Dates <small>(best planted before annual rains)</small>	Fertility
Premium Clover Blend	30%	Low-Moderate	6-6.8	5.8	well drained heavy fertile soils	1/4"	  March 1 - May 30, Aug 15 - Oct 30	M-H
